PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in data structures and algorithms, object-oriented programming, and software development. Experienced in building AI-powered and web-based applications using Python, Java, JavaScript, and API integrations. Focused on software engineering, backend/full-stack development, databases, and writing clear, maintainable code.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Web: HTML, CSS, JavaScript, Responsive Web Development, REST API Fundamentals

Database: SQL Fundamentals

Tools: Git, GitHub, Vercel, Replit

Other: OCR, External API Integration, Web Application Deployment

PROJECTS

AI Medicine Assistant

- Built an OCR-based app that extracts medicine names and details from photographed labels.
- Integrated external medicine-information APIs to retrieve and display drug details automatically.
- Combined OCR extraction and API lookups into one end-to-end workflow, from image to information.

Handwritten Text Scanner

- Built an OCR-based app that converts handwritten content into digital text.
- Used Tesseract OCR with a Flask backend and a Flutter front end to power the app.
- Designed the REST-style integration between the Flutter front end and Flask backend.

Personal Portfolio Website

- Designed and deployed a responsive portfolio showcasing my projects and technical skills.
- Integrated GitHub projects and contact functionality using HTML, CSS, and JavaScript.

EDUCATION

B.Tech in Computer Science Engineering — JB Institute of Technology, Dehradun

Expected Graduation: 2027

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 AI Foundations Associate
